

Trivia Contest

We invite you to play in our Trivia Contest found at the end of this Newsletter. The prize for this month is a Rose Multi-Purpose Tool.

Product Headlines

New KVM Rack Drawers

We are pleased to announce a new addition to our [RackView](#) line of KVM Rack Drawers. Rose is now offering 15" and 17" LCD's in a "Clamshell" model with either Trackball or Touchpad mouse.

New Vista USB

The Vista USB is now ready for production. The Vista family is our low cost SOHO line of KVM switches. With the Vista USB you are ready to easily connect to the newer PC's that use USB as their standard.

New Kiosk Solutions

Rose introduces the new [RackView POS](#), a touchscreen LCD with high resolution display, a built-in USB hub, anti-glare tempered glass and speakers. Flexible stand base supports angle adjustments from -5° to 90°.

In the Spotlight...

New KVM over IP Switch!!!

Featuring our exclusive "easy-glide" mouse control

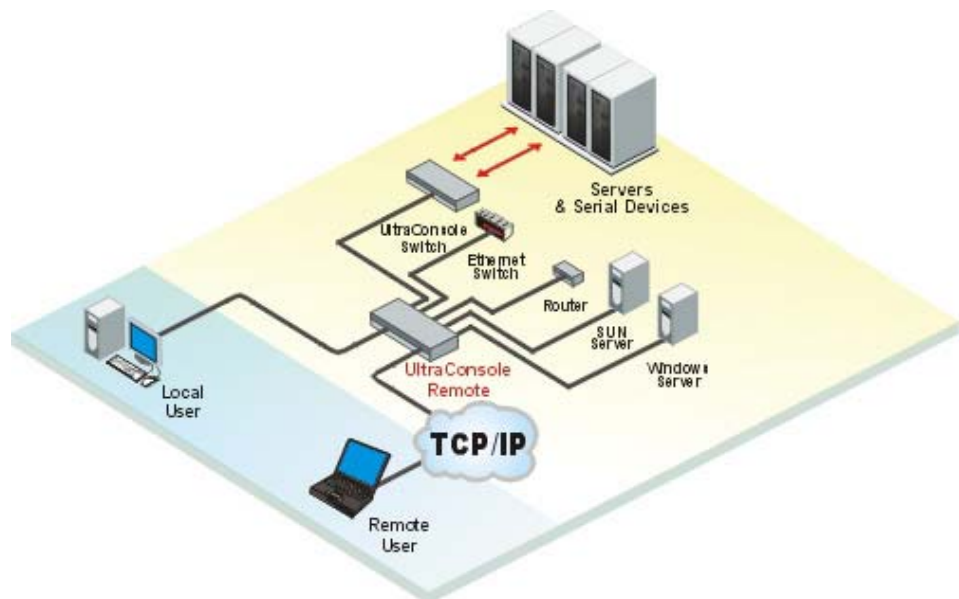

Houston, TX – Rose Electronics is pleased to announce two new single-user KVM switches with integrated KVM over IP, the [UltraConsole Remote](#) and the [UltraView Pro Remote](#). Both products are priced to meet your budget needs but do not compromise on quality or performance. In fact, both new products come with Rose Electronics' exclusive "easy-glide" mouse control. No more sluggish mouse movements over IP. Regardless of your environment, you'll have your solution with these two new entries in our KVM over IP family of products.

Both new products support multi-platform environments. Additionally, the UltraConsole can even access and control serial devices. Each KVM port on the UltraConsole is individually configurable for PC, Sun, serial or just about any other platform you may be running. With Rose KVM over IP, there are no software licenses to purchase, it's easy to install and is never obsolete since it comes with free lifetime firmware updates.

If you need to view multiple computers simultaneously, simply switch to quad screen mode and receive real-time video feeds from up to four remote computers over IP.

With their ability to access your computers and servers locally or over IP, advanced on-screen menu system, built-in security, flash memory, easy expansion, and other features, you begin to get a sense of the advantages of the UltraConsole Remote and the UltraView Pro Remote. For deployments needing multi-user access, consider our UltraMatrix Remote line of KVM/IP switches. [Sign up for a briefing](#) , [call](#) or [e-mail](#) us for more information and details.

Did You Know?

...there is enhanced security on our KVM over IP products. Our [UltraLink & KVM over IP Switch](#) products utilize 128 bit Blowfish, 64 bit triple DES and IP exclusion to ensure the highest level of security for your network.

...Rose KVM switches have a MTBF of 50,000 hours.

... our [KVM over IP](#) products have features that can improve performance in low bandwidth environments.
