

RackView Panel mount

Panel mounted KVM Station

Connects easily to an optional single or multiple user KVM switch
High-resolution LCD monitor and Trackball
PS/2 connectors
Compatible with PC, UNIX, Sun, and Mac
Keyboard folds down or unit swings open for easy access into the rack

Features and Benefits

- Available in 15" or 17" models
- Resolution up to 1024 x 768
- Static panel mount with hinged access into the rack
- Fits in 7 – 9 rack units
- Only 4 inched deep
- Connects easily to a KVM switch, providing access to as many as 1,000 computers
- Quick and easy installation
- Supports AT/ XT, PS/2, and UNIX computers
- Front panel conceals unit when it is not in use
- Full size keyboard for typing comfort
- Front panel controls for quick adjustments

The RV Panel mount Advantage . .

The RackView panel mount offers the latest, most efficient way to organize and streamline your server rooms or multiple computers. The RackView panel mount is a rack mountable KVM station neatly fitted in a compact housing. The KVM station contains a high-resolution TFT/LCD monitor, a tactile keyboard, and a high-resolution trackball mouse.

The RackView panel mount can be placed at any height within a standard 19" rack. This offers the operator the maximum in comfort. The front keyboard panel conceals the unit when it is not in use.

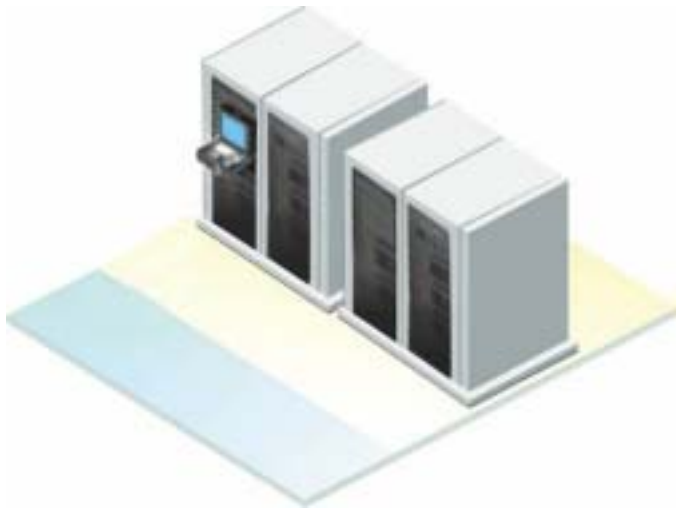

The RackView panel mount can be connected to an optional KVM switch offering single or multiple user access to as many as 1,000 servers or computers. Rose Electronics KVM switches are fully expandable and when combined with the RackView panel mount, your system becomes a versatile, distributed matrix controlled system with multi-user capability, controlled access to the servers, and many other features.

PC, UNIX, Sun, and Apple computers can easily be accessed, monitored, and controlled locally using RackView panel mount.

Unit swings open for easy access into the rack

Typical Application

Introduction The RackView panel mount is the perfect addition to your server room. It mounts easily at any height in a standard 19" rack. Connecting the RackView panel mount to an optional KVM switch offers the added convenience of complete access to as many as 1,000 servers or computers. Adding a multi-user KVM switch allows server management to be performed from multiple KVM workstations.

Installation RackView panel mount is very easy to install. Connect the hinged side of the unit to the rack rail, the keyboard, monitor, and mouse cables to the corresponding computer ports or to the KVM input of a KVM switch and you're done.

Front Panel The monitor's front panel has easy access switches which set the brightness, contrast, and invoke the On-Screen-Display. The OSD provides for an easy way to adjust all the monitors' parameters.

Keyboard The RackView' panel mounts keyboard is a full size keyboard with a separate numeric keypad. The keyboard cable has a PS/2, MiniDIN6 connector.

Mouse The RackView panel mount has a high-resolution trackball with a PS/2 connector.

Monitor The high resolution, static free, TFT/LCD color monitor provides a crisp, clear image with resolutions up to 1600 x 1200.

Options The RackView panel mount can be used with an optional KVM switch.
